

# How-to Guide

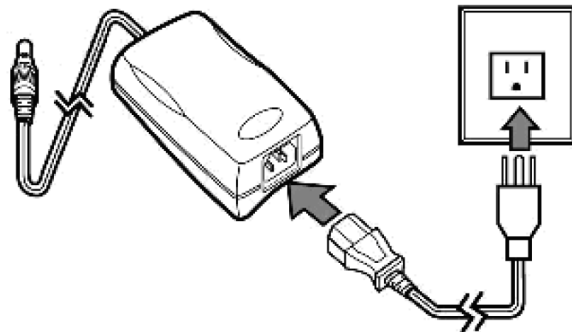

## Set up the Verifone VX520 Terminal

It's easy and quick. Follow these instructions. If you need assistance, please call your Service Account Manager.

**Step 1.** Make sure all parts are present

**Step 2.** Connect Power Pack with Universal Power Cord, then plug Power Cord into terminal as well as your outlet.

**Step 3.** Connect Ethernet cord into the ETH port located on the bottom side of the terminal. Plug the other end of the Ethernet cord into an active network port.

**IMPORTANT:** Do NOT plug the Ethernet cord into the RS232 port on the terminal

To install replacement receipt paper, refer to Step 2 of the Quick Installation Guide.

*Note: The Detachable bottom cover is used for cable management.*
